ACCULAZR™ AL5010

AL5010 is a high performance industrial laser scanner with cutting edge integrated control technology meeting the demands of existing and new automated facilities.

EXCELLENT PERFORMANCE
Using multiple lasers, the AL5010 is the only product in its class to use simultaneous scanning technology with a two laser design to aggressively read low grade barcodes over the largest scan area. With 1200 scans per second, the AL5010 can support applications with very high transport speeds or small bar codes. With DRX bar code reconstruction technology, tilt angle can be increased for reading damaged or misplaced labels.

EASE OF USE
The integrated touch button display technology quickly provides information on network connectivity, barcode reading quality, errors, trigger, and transmittal of information to the host. The five LED bar-graph provides a quick and simple way to determine the reading performance without using external computers or terminals. Using the upload or download buttons, the settings of the scan head can be uploaded or downloaded with a simple touch of one button. This functionality allows for hot swappable scan head replacement or when quickly installing many scanners at the same time.

REMOTE ACCESS
With an integrated web server and on-board TCP/IP, the IP address of the scanner can be accessed directly or remotely. The web pages are designed for simple and intuitive setup and monitoring of the system using a simple web browser. Advanced HTML5 is also present, allowing devices such as the iPhone or iPad to connect to the device directly using the same protocol as internet web pages. Screens have been optimized for the iPhone to allow for immediate access to the detailed performance of the system, dramatically reducing the time to troubleshoot any problems.

INDUSTRIAL FEATURES
With its rugged construction, IP65 protection class, 50°C max operating temperature and internal oscillating mirror, the AL5010 is purpose built for the most demanding industrial environments. The basic and enhanced wiring boxes are integrated and protected, allow fast and simple installation without additional cables.
