

Axicon PV Series Accessories

axicon

THE BARCODE EXPERTS

Designed for use with the Axicon PV- Verification Range

Adding Protection

Recommended additional protection for your Axicon verifier. This protective rubber boot is moulded to slide on and grip your PV unit, helping to reduce accidental damage.

Adding Mobility

Specifically designed belt bags are supplied with your Axicon PV unit¹, providing a handy storage device when not in use as well as allowing you to transport your verifier with ease. Additional bags are available from Axicon.

Adding Power

All PV units are supplied with a set of 4 AA alkaline batteries as standard². In order to increase your scan time, why not upgrade to rechargeable NiMH rechargeable batteries and a charger.

Printing Options

Axicon's policy of offering our customers maximum choice and flexibility now includes printing options on our portable range:

Option 1: Data Transfer

1. Save scans directly on to your PV unit
2. Download to your PC using the "Transfer" option and a USB memory stick.
3. Print using your desktop printer

Printer cable - available to purchase separately

Option 2: RS232

Purchase a PV printer connection cable and print directly to your existing RS232 printer.³

Option 3: Axicon Printer

Purchase either a mains or battery powered printer from Axicon

The PV-series mains powered ticket printer (Please note that the printer cable must be purchased separately)

The PV-series battery powered (rechargeable) ticket printer with fitted belt-clip (Please note that the printer cable must be purchased separately)

Notes:-

1. Not available in the U.S.A.
2. Only applies in territories where these can legally be shipped.
3. Failure to use an Axicon supplied printer cable will invalidate your warranty.
