

SC4000

Industrial Controller

Highlights

SC4000 is an industrial controller designed for high speed data collection in an ID-NET™ network of Datalogic Automation's 1D/2D code readers. SC4000 offers high communication performance and connectivity to the most common fieldbus systems by means of a complete range of optional modules.

• PERFORMANCE

SC4000 data concentrator offers high communication performance, excellent connectivity and advanced software tools for monitoring and control of data collection networks. Up to 31 readers can be connected to satisfy the most demanding applications. Through SC4000, a multi-station reading system can be realized in a very simple way. The SC4000 unit collects data, monitors the status of the ID-NET™ network and provides statistics.

• CONNECTIVITY

A large number of communication interfaces are provided to satisfy all the most common demands. Three standard serial interfaces, always available, can be combined with a complete range of optional modules providing connectivity to standard Ethernet TCP/IP network or to the most common fieldbus systems.

• EASE OF MAINTENANCE

SC4000 allows complete monitoring of the network status, immediately providing useful information about performance and malfunctioning to users as well as to Datalogic WebSentinel™, the new surveillance software solution for the total remote control and monitoring of the readers. Basic diagnostic and statistic information is directly available on the backlit 4-lines display while intuitive LEDs provide indications about the status of the device as well as of the entire network. When quick and reliable replacement is needed, SC4000 takes advantage of the embedded Backup module. This memory unit simplifies Backup and Restore procedures while granting secure and rapid replacement of any code reader in the network.

• EASE OF SETUP

SC4000 is easily programmed through Genius™, the multi-language SW configuration that helps to automate and speed up the complete network configuration and calibration.

• INDUSTRIAL FEATURES

SC4000 features IP65 (NEMA 4) protection class and an operating temperature up to +50 °C (+122 °F).
