Light curtain bar pairs

status: 2012-05-25

Find everything about light curtain bar pairs in this document:

- resolutions of 5...112 mm
- monitoring heights of 35...5784 mm
- 4 sections
- 9 mounting options (mechanics)
- optional types
- segmentation

Beam spacing

Bar length in "mm"

Mechanical Model

Only 4 steps to your individual
light curtain bar pair!

A1	A2	A3	A4	A5	A6	A7	A8

Colour of rods:

- 0 standard
- N naturally anodized
- S black anodized
- B plate-finished aluminium

Cable length in "dm"

- 000 standard (4m) = 040

Cable outlet

- 0 standard (face site)
- H backward
- F side looking

Options for optical or shielding

- 0 standard (relative range about 100%)
- 1 reduced range (relative range about 25%)
- 2 on request (special LEDs)

Front cover

- 0 standard, PVC, red transparent
- S PMMA, black
- G glass plate
- F with peelable protection foil

Cable type

- 0 standard, according light curtain type
- C with M12 connector
- W with Wago connector
- M with M8 connector at the bars type LA

Bar variations

Overview

Type	Control unit ¹	Max. number of beams	Description
LA	integrated	128	Inexpensive system for simple applications, switching output, parameterisable, optical synchronisation, 24 Vdc
LG	LVM	250	Versatile solution for obstacle recognition; sensitivity is adjustable. 230 Vac
LI	LVX, LVE	up to 600	The standard device used for measuring! The multiplicity of interfaces facilitates straightforward connections.

Connector standard type

Connection is realised by fix mounted wiring cable (standard length 4 m). The connector pin assignment is listed in the technical information for the control unit.

LG		screwable round pin plug. e.g. receiver (coupling) 
LI		pluggable clamp make Phönix CombiCon non-interchangeable coded
LA		Core cable ends

Beams

Beam spacing

Beam spacing	Module
	5
10 mm	10
12,5 mm	12,5
25 mm	25
27,94 mm	28
50 mm	50
55,88 mm	56
94 mm	94
100 mm	100
111,76 mm	112

¹ Please notice the technical information for control units!

Monitoring heights

Monitoring height: Distance between first and last beam in mm (rounded).

Preferential types are bold.

a: beam spacing; n: number of beams

$$\ddot{U}H = a \times (n-1)$$

Mechanics

With the required number of beams and the beam spacing, the mechanical design of the bars can be defined on the basis of the following tables.

For special models don't hesitate to contact us!

Combinations

Mechanic	Typ of bar			Beam spacing		
	LG	LA	LI	5	10 u. 12,5	25 ... 112
N	X	X	X		X	X
L	X	X	X		X	X
Q	X	X	X		X	X
I	X	X	X		X	X
H	X		X		X	X
M	X		X		X	X
A	X	X	X			X
F	X		X		X	X
T	X	X	X	X		

Overview Profiles for Light Curtains

Cross - Section				
Color	Naturally anodized			
Code	N	Q	I	T
Max. Length	L 4000 mm	H 1500 mm	M 900 mm	F 3000 mm
	Naturally anodize			
	Plate-finished Al.I			
	2500 mm			
				
				
				
				

Bar length

$$L = \ddot{U}H + X + Y$$

(rounded up to entire 10 mm)

Dimension Y (minimum)

Typ LG and LI:

	5	10...12,5	25...28	50...56	94...112
N	-	38,5	45,0	70,0	130,0
L	-	38,5	45,0	70,0	130,0
Q	-	38,5	45,0	70,0	130,0
I	-	38,5	45,0	70,0	130,0
H	-	48,5	55,0	80,0	140,0
M	-	24,5	31,0	56,0	116,0
A	-	38,5	45,0	70,0	130,0
F	-	38,5	45,0	70,0	130,0
T	17,5	-	-	-	-

Typ LA (with integrated control unit):

	5	10...12,5	25...28	50...56	94...112
N	-	153,5	160,0	185,0	245,0
L	-	153,5	160,0	185,0	245,0
Q	-	153,5	160,0	185,0	245,0
I	-	153,5	160,0	185,0	245,0
A	-	153,5	160,0	185,0	245,0
T	67,5	-	-	-	-

With relay: additional 20 mm!

Dimension X

	5	10...12,5	25...112
N	-	13,5	20,0
L	-	13,5	20,0
Q	-	13,5	20,0
I	-	13,5	20,0
H	-	55,5	62,0
M	-	24,5	31,0
A	-	13,5	20,0
F	-	13,5	20,0
T	17,5	-	-

Tolerance of beam position ± 2 mm.

Dimensions are mm.

Longer bars are possible, but cause extra charge.

Mechanics N, L, Q (profile 10x27)

Note for type N: without machining

Special design with free positioning of the fastening elements is possible on request.
Dimension A and B, Number of bohr holes/slots can be seen on side 15.

Mechanics F, sidelooking

Mechanics T for 5 mm beam spacing

Mechanics I, H and M (profile 12x24)

Mechanics I	Mechanics H	Mechanics M
The good valued standard mechanics!  For dimensions A, B and the number of threaded stud bolt see side 15.		

Spacing and number of fastening elements

Mechanics	fastening elements	section
I	M4x10 threaded stud bolts	12x24
L	Slot hole	10x27
Q	Cross-hole	10x27

Possible special models:

- different length of the threaded stud bolts
- different position of the fastening elements

bar length (L)	spacing (B)	quantity (z)
120...140	90	2
141...250	100	2
260...350	200	2
360...500	300	2
510...620	400	2
630...660	500	2
670...750	600	2
760...890	700	2
900...950	800	2
960...1100	400	3
1110...1250	500	3
1260...1450	600	3
1460...1550	400	4
1560...1850	500	4
1860...2060	600	4
2070...2350	500	5
2360...2450	520	5
2460...2750	600	5

3150...3350	600	6
3360...3560	800	5
3570...3860	700	6
3870...4030	520	8
4040...4300	900	5
4300...4570	700	7
4580...4850	500	10
4860...5130	800	7
5140...5250	700	8
5260...5450	520	11
5460...5650	600	10
5660...5850	800	8

formula of dimension "A":

$$A=0,5 \times (L-B \times (z-1))$$

Tolerance

Limit deviations (all values in mm):

Nominal size range	> 30 ≤ 120	> 120 ≤ 400	> 400 ≤ 1000	> 1000 ≤ 2000	> 2000 ≤ 4000
Spacing (B) for mounting elements	$\pm 0,30$	$\pm 0,30$	$\pm 0,8$	$\pm 1,2$	
Profile length (L)	$\pm 0,80$	$\pm 1,20$	$\pm 2,0$	$\pm 3,0$	± 4

Tolerance for value B^* at nominal size $2000 < L \leq 4000$ mm: $\pm 2,0$ mm

Cable length (D)

Tolerance of wires: $\pm 1\%$, minimum ± 1 cm.

Beam position (C)

The beam position is generally ± 2 mm. Other tolerances on request.

Options

Bar colour

A1	A2	A3	A4	A5	A6	A7	A8

A 1	description
0	standard (natural anodised; mechanics F: blank)
N	natural anodised
B	blank
S	black anodised
R	powder coating in RAL colours
...	additional colours on request

Cable length

... in "dm" example:

A1	A2	A3	A4	A5	A6	A7	A8

A 2,3,4	description
000	standard (4 m)
005	0,5 m
100	10 m
150	15 m

Note:

- For longer cable use preferably transmitter side
- Maximum-length: 20 m with LVM

25 m with LVX, LVE
30 m for LA

- Tolerance for connector cables: $\pm 1\%$, minimum ± 1 cm
- Please contact our technical support if you want to:
 - Make changes at the connector cable (e.g. lengthening; use different connectors).
 - Use two Light curtain bar pairs on one control unit with more than 4 m connector cable each bar pair.

Cable outlet

A1	A2	A3	A4	A5	A6	A7	A8

A 5	0	H	F
description	standard, front side	"backward"	"side looking"
draft			

Range

The range of our light curtain bars essentially depends on our control units. Please take notice of the corresponding specification.

The „relative switching threshold“ relates to the standard light curtain bars ex construction date March 2001.

Range/Mechanics

mechanics	relative range
F	70%
T	80%
others	100%

Options for transmitter bars

A1	A2	A3	A4	A5	A6	A7	A8

A 6	relative range	example range for LVX*
1	25 %	> 60 mm
8	40 %	> 100 mm
7	53 %	> 180 mm
0	100 %	250 to 6000 mm
6	114 %	< 7000 mm
3	124 %	< 7500 mm
5	130 %	< 8000 mm
4	137 %	< 8300 mm
9	156 %	< 9300 mm
2	on request (special-LED)	

*Values are measured extrema, the limits have to be tested in the application.

Preferential types are bold.

LA/LC and relative range >100%: Intensive tests are necessary. Please contact our technical support.

Options for receiver bars

A1	A2	A3	A4	A5	A6	A7	A8

Cable type

A1	A2	A3	A4	A5	A6	A7	A8

A 8	bar type			description
	LA	LI	LG	
0	X	X	X	standard, according to light curtain type. (see "Bar variations")
H	X	X	X	non-halogen; cable casing PUR; Schleppflex; cable diameter 6,0 ±0,3 mm
C	X	X	-	M12 connector with 0,75 m connector cable. 
A	X	-	-	with Combi-Con connector.
W	X	-	-	with Wago connector.
D	X	-	-	with diode connector
M	X	-	-	M8 connector (4-pole at transmitter and receiver bar) 
B	-	X	-	preassembled M12 fitting and CombiCon, e.g. for control unit type LVB

For detailed specification please contact our technical support!

Segmentation

Take notice of the red marking on the transmitter segment bars!

Note:

- The overall wire length (length of all segment cable plus length of the wiring cable) is limited to 10 m.
- The ranges within a segmented light curtain are allowed to differ up to 1.4. At greater variety the relative range has to be adjusted (see AL **Fehler! Textmarke nicht definiert.**).
- For start- and intermediate segment use preferential types only!
- The plugable bar segments are connected with M12 circular connectors on the segment wiring.
- Wire length between two segments is limited to max. 1 m.
- Only use transmitter or receiver bars in a segment row. Mixing up could damage the electronics!

Parallel arrangement

For monitoring a removal, e.g. from a rack, the following arrangement arises. For signalling the right removing area, up to 6 display bars can be implemented.

Used Transmitter: 2 Segment -ZBxxx

1 Segment -Llxxx

Used Receiver:

2 Segment -ZBxxx

1 Segment -Llxxx

xxx: length of the segment wiring in cm.

Used control unit:

LVE, LVX

Frame arrangement

Often used for measuring object dimensions, but also used for access monitoring at racks, which don't allow a parallel arrangement.

schematic view

Used Transmitter

1 Segment -ZSxxx

1 Segment -Llxxx

Used Receiver:

1 Segment -DSxxx

1 Segment -RRxxx

xxx: length of the segment wiring in cm.

Used control unit:

LVE, LVX

Options for start and further segments

beam sequence	Standard	inverted
	beam 1	
	beam 2	
	beam 3	
	beam 4	beam 4
		beam 3
		beam 2
		beam 1

Options and additional length of the bars

phone and additional length of the cable				
option	cable exit	inversion	X-value ¹	Y-value
ZSxxx		-	x+20	y
YSxxx		X	y	x+20
ZBxxx		-	x	y
YBxxx		X	y	x+20
Only for end segment				
Llxxx		-	x	y
Klxxx		X	y	x+20

xxx: length of the segment wiring in cm. Maximum 1 m permitted.

Interchanged segment sequence

The beam counting starts with the second segment.

beam sequence	segment 1	segment 2	segment 1	segment 2
	standard	standard	standard	inverted
	DS	RR	DS	QR
	beam 9	beam 1	beam 9	8
	10	2	10	
	11	3	11	
	.	.		
	.	.		
	.	.		3
				2
		8		beam 1

light curtain bar pairs

Options and additional length of the bars

option	cable exit	inversion	X-value ¹	Y-value
DSxxx		-	x+20	y
CSxxx		x	y	x+20
DBxxx		-	x	y
CBxxx		x	y	x+20
Only for end segment (with interchanged segment sequence)				
RRxxx		-	x	y
QRxxx		x	y	x+20

xxx: length of the segment wiring in cm. Maximum 1m permitted.

Type designation of the segment string

The project code stands for this table:

Description	Note
Wiring cable length (standard 4 m)	
Start segment	
No. of beams	
Modul configuration / beam spacings	
Profile lengths	
Mechanics	
Segment cabel length (standard 0,5 m), not pluggable!	Max. 1m permitted
Interim segment	
No. of beams	
Modul configuration / beam spacings	
Profile lengths	
Mechanics	
Segment cabel length (standard 0,5 m), not pluggable!	Max. 1m permitted
End segment	
No. of beams	
Modul configuration / beam spacings	
Profile lengths	
Mechanics

Protection class

Important notes:

- Protection class is specified for duly usage only.
- Pay attention to the Informations „Mounting Instructions for Light Curtain Bar Pairs“ and „Starting up control unit...“.
- ☐ Protection class can be affected by changes to the devices (e.g. removing labels, loosen a screw, trimming a stud bolt, drill through the housing). Due to keep warranty do not make any changes to the devices.

Optional:

Type	Note
-IP65	Protection class IP65 for bar pairs type LI Please note: For bar pairs type LG the connectors only have protection class IP20!
-IP65-ST	Only for bar pairs type LG with connectors for control units with option "-IP65".

Compendium/ Technical data

Light curtain bar pairs

Detail	Description								
Mechanics	N	L	Q	I	H	M	A	F	T
Material	Aluminium, front-cover plastic red transparent								
Cross-section	10x27		12x24				40x12	12x58	
Color	natural anodised		natural anodised				blank	natural anodised	
Type of bar	LA, LG, LI		LA, LG, LI				LG, LI	LG, LI	
Max. profile lengths	4000		6000	1500	900	2000 2400	3000	2500	
Protection class of the bar pairs according DIN 40050	IP54		IP 54	IP20	IP20	IP 54	IP 54	IP 54	
Humidity	Up to 90 % relatively, non-condensing								
Temperature	-20°C... +40°C								
Illuminant	Infrared, app. 800 ...1000 nm Other wavelengths by request								
Allowed angular deviation	+/- 10° (between transmitter and receiver bar)								
Ambient light immunity	high ambient light immunity, avoid direct sunlight (DC light) towards the receiver bar								
Wiring cable	Fix mounted wiring cable, length 4 m (± 1%); PVC; for rigid mounting; q.v. chapter "Options"								
Interference resistance	Take notice of the technical information of the control unit								

Accessory / Adapter plugs

Type	Description
LILVM	Allow the connection of bars type LI to control unit LVM. Protection class IP00
LGSCAN	Allow the connection of bars type LG to control unit SCAN or LVX/LVE. Protection class IP00
M12LVX	Connector cable (set) with M12 connectors. For connecting a transmitter or receiver bar with option M12 to the control unit LVX or LVE.
FP-30-00012	Mounting kit for „isolated mounting“ of mechanics T
FP-30-00013	Mounting kit for „isolated mounting“ of mechanics I

Details for initial operation and service

- Do the initial operation professionally and in accordance to our mounting instructions for light curtain bar pairs, the technical documentations and the relevant regulations.
Pay attention to an EMC-compatible handling of the shielded connector cable of our bar pair type LI and LG.
- The control unit must be off-circuit when connecting or disconnecting the bars!
- It is generally not necessary to align the bars exactly. It should nevertheless be possible to adjust the bars in specific cases. The bars may also need to be moveable longitudinally.

- The monitored area between the transmitter and receiver bars must be clear of obstructions so that the bars can “see” each other.
- Assemble with the power supply disconnected. Do not expose the bars to stress.

- Avoid ground loops: Bar pairs must have the same earth potential.
- Avoid the effects of external light sources (e.g., from flashlights or sunlight) on the receiver bar.

- Condensation, fog or smoke can impair the functioning of a light curtain.
- The front panel must not be scratched. It must be kept free of obstacles and it must be kept clean (do not use any cleaning agents containing solvents).

light curtain bar pairs

- Danger from reflective surfaces: Reflective surfaces in the area around the light curtain must be avoided. Otherwise obstructions will not be detected. Optical sensors can affect each other even by reflexions. This could affect the functionality of the devices.

- Avoid optical sensors from mutually affecting each other (e.g., other light curtains, light barriers).

- Use a test pin to check that the light curtain is working in the entire monitoring area.
- Connections must be done EMC-compatible.
Note: unshielded cable wires have to be shorter than 2 cm.
- Warranty and guarantee claims expire after any changes were made to the light curtains connector cable or the connectors itself!
- A potential differenz of 60V between the light curtain housing and the supply voltage may not be exceeded.
- Do not use any high-pressure cleaner or steam blaster on our devices.
- Attention for horizontal mounted bars:
Fluid on the front foil is able to interrupt the beams and after a long residence time it can enter the bar! There is no warranty to the protection class in this position!
Increased risk of contamination!

Important note:

The light curtains are not certified safety light curtains according EN 61496. They're no safty light curtain in terms of the EG-89/392/EWG including 93/44/EMW, appendix 4.

Therefore, they must not be used so as not to endanger individuals.
