

Latest Optical Safety Solutions

You will be pleased to know that we are now holding substantial stocks of the Datasensing range of safety products here in the UK for next day delivery. For a limited period we are offering **extra discounts** on our stocked product, so why not contact us today to discuss your requirements!

Latest SLS Sentinel Safety Laser Scanners now offer 275° protection at 5.5m

The enhanced Datasensing SLS Sentinel uses the latest Time-of-Flight laser measurement technology. These safety scanners are used in applications for area scanning and speed monitoring around AGV's and other moving vehicles in industrial environments. The scanners can also be used for access control around machines and benefit from integrated muting. There are so many safety applications you can solve using the SLS Sentinel that we have produced both an application example brochure and a short video for you. If you like what you see please contact us for a loan or demonstration.

SH4, the most versatile Safety Light Curtain we have ever produced, now with programming over Wi-Fi

**EASY:
ORDER,
INSTALL,
CONFIGURE,
PROGRAM,
MAINTAIN HAVE
NEVER
BEEN EASIER**

Datasensing has recently launched a new range of Type 4 safety light curtains called the SH4. To cover different application needs, models are available with basic, standard or advanced functionality, offering a large number of functions and giving the possibility to configure the device through simple wiring, DIP-Switches or programming software. On advanced models, the programming of functions like blanking, reduced resolution and muting is possible without using any external interfaces, instead you access the light curtain directly using an App over Wi-Fi. Our new brochure will guide you through all of the functions that make the SH4 the most versatile safety light curtain we ever have produced.
